

### **MEMORANDUM**

	<mark>ISO: 60509448 (BE193)</mark>	File Code: 422.2.4.1	Doc ID #: 00763.03	
TO:	Javier Rodriguez, P.E., TSM&O Progr	ram Engineer		
FROM:	Gregg Letts, P.E.			
SUBJECT:	95 Express Phase 1 ELM Performance Update 2 (Through March 2017)			
DATE:	May 12, 2017			
CC:	Don Avery, P.E., Jose Grullon, P.E., Alex Mirones, documentcontrol			

## I. PURPOSE

The purpose of this memorandum is to provide a status update on the performance metrics documented in the Memorandum – 95 Express Phase 1 Express Lane Markers (ELM) Performance.

#### II. BACKGROUND

The new ELM installation occurred between September 21, 2016 and December 21, 2016 (approximately three months). The comparisons shown herein will based on the agreed analysis period of six months prior to installation (from March 2016) and for a full six months after the completion of the installation (through June 2017).

This second update is for all available data through March 2017.

## III. PERFORMANCE CRITERIA

The four performance metrics that are being tracked for this analysis include:

- 1. ELM Replacement<sup>1</sup>
- 2. Lane Diving (Warnings plus Citations)<sup>2</sup>
- 3. Crashes in the Express Lanes<sup>3</sup>
- 4. Vehicle Throughput<sup>4</sup>

<sup>&</sup>lt;sup>1</sup>Data provided by Archer Western (Contractor on I-95 Pavement Rehab Project) and DBI (District 6's Asset Maintenance Contractor)

<sup>&</sup>lt;sup>2</sup>Data provided by FHP (Though Bi-weekly Invoicing for D6 FHP Hireback Program)

<sup>&</sup>lt;sup>3</sup>Data provided by D6 SunGuide® Center (via SunGuide® Software)

<sup>&</sup>lt;sup>4</sup>Data provided by Florida's Turnpike (via Monthly Toll Gantry Reports)

Memo – 95 Express Phase 1 ELM Performance Update 2 (Through March 2017) May 12, 2017

# IV. RESULTS (UPDATE 1)

Performance Metric	Monthly Avg. for Six Months Before New ELM Installation	Monthly Avg. During New ELM Installation	Monthly Avg. After New ELM Installation <sup>5</sup>
ELM Replacement <sup>1</sup>	4,030	21	334
Lane Diving (Citations + Warnings) <sup>2</sup>	152	82	18
Crashes in Express Lanes <sup>3</sup>	81	60	53
Vehicle Throughput <sup>4</sup>	1,874,077	1,816,973	1,942,622

Through March 2017, the new ELM installation has contributed to the following average monthly improvements for 95 Express Phase 1:

- ELM Replacement is down 92%;
- Lane Diving is down 88%;
- Crashes within the facility are down 34%; and,
- The average monthly express lanes volume has increased by 3.7%.

Graphs showing the positive trends for lane diving and crashes in the express lanes are shown on the following page.
